

PlayMe.

REIMAGINING MUSIC FOR THE NEXT BILLION
LISTENERS

DOCUMENT	STAGE	SECTOR	YEAR
Executive Summary	Pre-Seed / Seed	MusicTech	2026

The Problem

The music streaming market is massive — and massively broken.

The global music streaming market is worth **\$54.1 billion** (2025) and is projected to exceed **\$115 billion by 2030**, growing at a CAGR of 17–21%. Yet the industry is riddled with problems that incumbents have no incentive to solve.

PROBLEM	IMPACT
Algorithm Fatigue	Users feel trapped in "echo chambers" — platforms prioritize safe, repetitive hits over genuine music discovery. 73% of Gen Z listeners report wanting more diverse recommendations.
Feature Bloat	Spotify, Apple Music, and others aggressively push podcasts, audiobooks, and video content — alienating music-first listeners who just want to hear songs.
Emerging Market Failure	In India, 96% of smartphone users stream music, but only 38% have ever paid . Current pricing models fail to convert the next billion users.
Artist Exploitation	The "pro-rata" royalty model funnels money to superstars. Mid-tier artists earn fractions of a penny per stream, making music unsustainable as a career.
Content Saturation	150,000+ tracks uploaded daily — including floods of AI-generated spam — makes quality discovery nearly impossible.

 CORE INSIGHT

Users don't need *another* music library. They need a **smarter, more intentional listening experience** that feels premium, personal, and alive.

The Solution: PlayMe

A music-first streaming platform built for how people actually want to listen.

Immersive Cinematic Player

Full-screen dynamic backgrounds, adjustable YouTube video overlays (Full → Vivid → Ambient → Dim), and glassmorphic premium UI.

Word-by-Word Synced Lyrics

Real-time karaoke-style lyrics with adjustable timing offset — far beyond the line-by-line lyrics offered by competitors.

AI-Powered Intelligence

Gemini-powered Vibe Queues, mood detection, AI music tutor, and smart track summaries that understand context.

Live Concert Streaming

Browse and watch live performances, festivals, and concerts in real-time — a feature no competitor bundles natively.

Market Opportunity

A \$115B market with massive untapped segments.

 **INDIA OPPORTUNITY**

India is the world's fastest-growing music streaming market with 37% YoY subscriber growth. 96% of smartphone users stream music — but only 38% have ever paid. PlayMe is positioned to crack this conversion gap with its freemium-first, premium-feel approach.

Business Model

PlayMe operates a **freemium model** with four diversified revenue streams:

Competitive Landscape

FEATURE	PLAYME	SPOTIFY	APPLE MUSIC	YOUTUBE MUSIC	JIOSAAVN
Music-First Focus	✓	✗ (Podcasts)	✓	✗ (Video)	✓
Word-by-Word Lyrics	✓	Line only	Line only	✗	✗
AI Mood Playlists	✓ Gemini	Basic	✗	✗	✗
Live Concerts	✓ Built-in	✗	✗	✓	✗
Video Integration	✓ Adjustable	✗	Limited	✓	✗

FEATURE	PLAYME	SPOTIFY	APPLE MUSIC	YOUTUBE MUSIC	JIOSAAVN
Downloads (Audio+Video)	✓ MP3+MP4	Audio	Audio	Audio	Audio
Zero Licensing Cost	✓	✗	✗	✗	✗

⚡ KEY DIFFERENTIATOR

PlayMe leverages YouTube's existing music ecosystem, **eliminating the need for expensive record label licensing deals** that cost competitors 65–70% of their revenue. This fundamentally changes unit economics and allows aggressive pricing in emerging markets.

Technology & Architecture

Built on a modern, scalable full-stack architecture.

Frontend

- React 19 with Vite for blazing-fast builds
- Tailwind CSS 4 for responsive UI
- Motion/Framer for fluid animations
- IndexedDB (Dexie) for offline-first caching
- YouTube IFrame API for video playback

Backend

- Node.js + Express REST API
- JWT authentication + bcrypt encryption
- Nodemailer for transactional emails
- Google Gemini AI integration
- YouTube Data API v3 + yt-search

External Integrations

- **YouTube** — Audio/video streaming & search
- **Genius** — Synced lyrics fetching
- **Last.fm** — Music metadata enrichment
- **Spotify API** — Recommendation engine
- **Google Gemini** — AI mood & vibe analysis

Infrastructure

- Currently deployed on **Render**
- Ready for AWS/GCP migration at scale
- PostgreSQL migration planned for production
- CDN-ready static asset architecture

Traction & Roadmap

The Ask

SEED ROUND

₹50L – ₹1Cr

(\$60K – \$120K USD)

USE OF FUNDS	%
Engineering & Infrastructure	35%
User Acquisition & Marketing	25%
Mobile App Development	20%
Legal & Compliance	10%
Operations & Contingency	10%

Vision

*"PlayMe exists to make music feel alive again. In a world where streaming has become passive background noise, we bring back the **magic of intentional listening** — where every song has lyrics dancing on screen, where AI understands your mood, where live concerts are one tap away, and where the interface itself is a work of art."*
